### WEATHERFAST PRI-COAT

**DESCRIPTION:** A heavy-bodied off-white general purpose primer and combined undercoat with fast drying and the easiest of sanding properties.

**USES:** The superfine texture of Weatherfast PRI-COAT makes this the ideal preparation coating for timbers and many other surfaces.  
PRI-COAT is low in odour when used in confined spaces and is fast drying.

**SIZES:** 10litre, 4litre, 2litre, 1litre, 500ml, 250ml, 100ml

#### PROPERTIES (at 20°C)

**COLOUR:** Off white

**TOXICITY:** See Precautions and refer to Safety Data Sheet

**FINISH:** Flat

**COVERAGE:** This product will cover up to 12 m<sup>2</sup> per litre per coat. Less on more absorbent surfaces.

**DRYING TIME:** Touch dry in 30 minutes at 20°C.

**RECOATING:** After 16 hours. Allow longer time for colder conditions, or multiple wet on wet applications.

**POT LIFE:** N/A

**MIXING RATIO:** N/A

**SPRAYING:** Wet on wet coats can be applied using up to 33% Weatherfast Spraying Thinners. Adjust the thinning ratio according to the pressure and type of equipment being used.

**THINNING:** Not recommended for brush or roller use but you can use up to 5% Weatherfast Brushing Thinners.  
Spraying – Thin with up to 33% of Weatherfast Spraying Thinners.

| <b>PREPARATION:</b>          | <b>New Timber</b> – Sand and remove dust from the grain with paper towel soaked in NORCLEAN-PLUS and allow to dry.<br><b>Other substrates</b> – Refer to appropriate NORGLASS SURFACE INFORMATION GUIDES for advice.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>APPLICATION:</b>          | Stir contents before use.<br>Ensure that the surface is dry and free from contaminants.<br>Apply by brush and short nap roller and allow 24 hours to dry.<br>If spraying, wet on wet coats are possible but longer drying time may be required for all the solvent evaporation to take place before over coating.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>PRECAUTIONS:</b>          | Wear protective clothing and use personal protective equipment as required<br>Keep away from heat, sparks, open flames or hot surfaces. No smoking.<br>Use only non-sparking tools. Take precautionary measures against static discharge.<br>Avoid breathing fumes or vapours.<br>Wash hands thoroughly after handling.<br>Avoid release to the environment.<br>Store locked up, in a well-ventilated place. Keep cool.<br>Keep out of reach of children                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>SPECIAL INSTRUCTIONS:</b> | Do not use on areas of continuous immersion.<br>Do not use under 2 pack paints.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>FIRST AID:</b>            | If poisoning occurs call a doctor or Poisons Information Centre (Aust) on 131126 or (NZ) 0800 764 766 and have label information ready.<br>If in Eyes rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists get medical advice.<br>If on Skin wash with plenty of soap and water. Take off contaminated clothing and wash before re-use. If skin irritation occurs get medical advice/attention.<br>If Swallowed rinse mouth. DO NOT induce vomiting. Give a glass of water. Never give anything to the mouth of an unconscious person. If vomiting occurs, place victim face downwards, with the head turned to the side and lower than the hips to prevent vomit entering the lungs.<br>If Inhaled remove person to fresh air. Remove contaminated clothing and loosen remaining clothing. Allow person to assume most comfortable position and keep warm. Keep at rest until fully recovered. Get medical advice if breathing becomes difficult. |
